

# LECO – GROUNDCOVER

... the reliable weed protection!

**DURABLE**

**UV RESISTANT**

**TEAR RESISTANT**

**AIR & WATER PERMEABLE**

The **LECO – Groundcover**, made from durable polypropylene, is a reliable solution for weed control. It provides a sturdy barrier that prevents weed growth while remaining air- and water-permeable at the same time. This supports a healthy plant growth and ensures an optimal soil moisture.

Due to its high versatility, the weed-control fabric is ideal for the application on paths, patios, planting beds and plant nurseries.

Furthermore, do the integrated green marking lines not only ensure an eased individual customization, but also the precise installation of the fabric.

Thanks to its high durability, the **LECO – Groundcover** offers a long-lasting and efficient alternative to chemical weed killers and proves to be a practical and permanent solution for a well-maintained garden.
